Professional Summary

Cybersecurity Engineer with hands-on experience in incident response, SIEM operations, threat detection, vulnerability management, and security automation. Proficient in operating enterprise security platforms and Python-based automation to improve detection accuracy and response efficiency. Experienced in streamlining security processes and supporting security operations, seeking to drive measurable security improvements in a dynamic environment.

Education

FAST NUCES, Karachi

Sep 2021 - May 2025

Bachelor of Science in Cyber Security

Skills

● IBM QRadar/Wazuh ● Troubleshooting & Incident Response ● Threat Analysis	● SOAR ● Security Operations ● Malware Analysis (Basic)	● Network Traffic Analysis ● Security Automation & Scripting (Python, Bash) ● Risk Assessment & Mitigation
--	---	--

Experience

Cyber Security Engineer

April 2025 - Present

SIRP

Conducted CIS benchmarking and Nessus policy compliance assessments to identify OS-level vulnerabilities, implementing hardening controls that improved security compliance by 74% and reduced exploitable attack surface.

Deployed and supported endpoint and perimeter security controls, delivering global security POCs to evaluate EDR, firewall, and Microsoft solutions (including Crowd Strike Falcon), ensuring SOC alignment and incident readiness.

Developed Python automation scripts using REST APIs to enforce security controls and streamline operational tasks, improving SOC efficiency, consistency in response actions, and reduction of manual errors.

Information Security Intern

Aug 2024 - Sep 2024

ThreatCure

Supported incident detection and response using IBM SOAR and Socradar, analyzing suspicious logs, managing cases, and executing playbooks to enable timely triage, investigation, and escalation.

Implemented and tuned IBM Qradar SIEM, ingesting Sysmon, firewall, and network logs to improve threat visibility, correlation, and alert fidelity across monitored environments.

Information Security Intern

Jun 2024 - July 2024

Trillium Information Security Systems

Contributed to cross-functional teams to analyze emerging threats and develop proactive security measures.

Trained in networking, cybersecurity, digital forensics, and GRC through hands-on projects and bi-weekly assessments.

Projects

CAPEv2 Automated Malware Analysis Deployment

Deployed and configured an automated malware analysis environment on Linux with a Windows KVM sandbox for behavioral analysis.

IBM QRadar Deployment and Monitoring

Deployed IBM QRadar SIEM across two environments, configuring offense, event, and flow rules, and integrated IBM SOAR to automate threat detection and response, enhancing incident management and security posture.

Certifications

- Certified Ethical Hacker (CEH) (In progress)
- Google Cybersecurity Certification
- EC-Council's Network Defense Essentials (NDE)
- IBM Security QRadar Functions and Capabilities (Pluralsight)
- Security Compliance Governance and Frameworks (Pluralsight)
- Blue Team Junior Analyst (Security Blue Team)
